Bruce Interview

What are you doing at U of T (1 yr)

- Teaching on cybersecurity policy in winter (March)
- Thinking abt AI policy
- future of democracy } organizing studying

Career path

- series of generalizations
  1. Maths of security
  2. computer security
  3. Sociology + policy of security
- engineering type person, but working in policy to help tech + policy talk.
- the more we can build sensible policy around technology, the better we'll do
- illumina AI wants to do the same, foster interactions

Who trusts LLMs? No, how do we make it trustworthy?

- Most frontier models engineered by American conservative leaning big tech monopolies for financial gain
- hallucinations are designed by humans who decided it would be more profitable
- regulate these companies to force them to make models more trustworthy
- what can we do from Canada?
  - Switzerland — public AI policy operations
    - govt + ETH Zurich
    - no copyrighted data
    - no global south labour
    - accountable
    - open (weights, training data)
    - free to use + build on
    - ~ best models at last yr.
  - big tech taking all talent
  - "black boxes" humans can too, but we learn to figure out many things.

Made with Goodnotes

Seatian from Singapore trained on South East languages.

- academia → industry one way transfer is dangerous.

Reviving Democracy (book)

1. politics
   - elections.
2. lawmaking
3. law enforcement
4. courts
5. citizens.

AI balances power.

"use the tools but you are responsible for your work."

Switzerland vote twice

- giving up authority?
- the ones that should stick are the ones which give humans the ability to express themselves more.

  But the distinct is not so <u>clear</u>.

- human autonomy in AI world
- 1st AI written law in Brazil.
- Ontario govt doc on AI use in govt.
- non-LLM AI.
  - navigation
  - social media feeds
  - medical diag.
  - predictive models

How do effects compound when AI is in every step?

AI Art

- no different than camera/synth/other artistic tech.
- ~~[illegible]~~ possibility.
